## **Illinois Primary Health Care Association (IPHCA) Selects NextGen Technology as Platform to Support Quality of Care Efforts**

*New contract signals NextGen Healthcare's continued growth in the community health center market*

Horsham, Pa. – July 24, 2008 – NextGen Healthcare Information Systems, Inc., a wholly owned subsidiary of Quality Systems, Inc. (NASDAQ: QSII) and a leading provider of ambulatory healthcare information systems and connectivity solutions, today announced that the Illinois Primary Health Care Association (IPHCA), a nonprofit trade association that represents community health centers (CHCs), has selected NextGen Healthcare's suite of enterprise software solutions. Products selected for implementation into member organizations include NextGen<sup>®</sup> EMR (Electronic Medical Record), NextGen EPM (Enterprise Practice Management) and the NextMD<sup>sm</sup> patient portal, as well as Quality Systems' integrated EDR (Electronic Dental Record) and hardware. In addition, IPHCA will deploy NextGen Healthcare's NextGuard<sup>sm</sup> Data Protection Services, which provides off-site, web-based data archiving, retention and disaster recovery preparedness services.

The NextGen technology will be implemented at five IPHCA-affiliated health centers during the initial phase of implementation and at as many as 25 additional participating centers in subsequent phases. IPHCA joins the more than 160 community and Native American health centers in 38 states that currently use NextGen technology.

"When looking to replace our current system, we were searching not only for a vendor with proven experience in the community health center market, but one whose technology provided the flexibility necessary for rollout across an entire network," said Bruce Johnson, president and CEO, Illinois Primary Health Care Association. "By utilizing best practice protocols to capture patient care and data outcomes, we hope to improve the quality of care

for the medically underserved in Illinois and to enhance operational efficiencies across member organizations.”

IPHCA is a member of the National Association of Community Health Centers (NACHC), a national health care organization dedicated exclusively to providing community-based health care organizations with strong advocacy, effective training, in-depth technical assistance, timely information and new resource opportunities. Currently, NACHC represents the program and policy interests of more than 1,000 community-based health care organizations in all 50 states, Puerto Rico, the District of Columbia, the US Virgin Islands, and Guam.

### **About NextGen Healthcare**

NextGen Healthcare Information Systems, Inc. a wholly owned subsidiary of Quality Systems, Inc. (NASDAQ: QSII), develops and markets computer-based practice management and electronic medical records systems for medical group practices and Healthcare Systems. ### **About Illinois Primary Health Care Association**

The Illinois Primary Health Care Association is a nonprofit trade association formed in 1982 that proudly serves as Illinois’ sole primary care association. IPHCA operates two offices—one in Chicago and one in Springfield. IPHCA strives to improve the health status of medically underserved populations by fostering the provision of high-quality, comprehensive health care that is accessible, coordinated, community-directed, culturally sensitive and linguistically competent. For more information about IPHCA, please visit [www.iphca.org](http://www.iphca.org).

This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company’s future performance, as well as management’s expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company’s ability or inability to attract and retain qualified personnel; possible regulation of the Company’s software by the U.S. Food and Drug Administration; uncertainties concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods’ financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems’ periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company’s quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company’s revenues and operating results are very difficult to forecast. A major portion of the Company’s costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company’s period-to-period financial

performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
